In August 2007, new national occupational standards for Playwork level 2 were approved.

The Level 2 Diploma in Playwork (NVQ) (QCF) is aimed at staff working directly with children and young people in a setting whose main purpose is to provide children and young people with opportunities for freely chosen, self-directed play. These staff do not have full responsibility for the play environment but make a significant contribution to supporting play.

Although the Award is a free-standing qualification, the units that make up the Award also sit inside the Certificate and, although the Certificate is free-standing, the units that make up the Certificate also sit inside the Diploma. The Award and Certificate units mainly cover knowledge and understanding derived from the level 2 National Occupational Standards for Playwork. They also require a limited amount of application in a Playwork setting. This could be done in a limited period of time, for example whilst on a holiday play scheme or on work experience from a college course. The Award and Certificate, therefore, are intended to prepare the learner for employment, and this is their purpose. They do not confirm occupational competence, only that the learner is ready to enter employment as a playworker.

The Level 2 Diploma in Playwork (NVQ) (QCF), since it includes the Award and Certificate units, also covers the knowledge and understanding from the National Occupational Standards, but also requires the learner to demonstrate the full application of this knowledge and understanding over a period of time in the workplace. The Diploma, therefore, is intended to confirm the learner's occupational competence. This is reflected by including '(NVQ)' in the qualification title.

These new qualifications have been designed in consultation with both industry and educational experts and offer total flexibility to centres to help improve the candidate learning environment and provide fit-for-purpose qualifications to those playworkers working in various locations and situations, and support the government aims to provide better training and development opportunities for staff working with children to ensure that all children can access quality play initiatives.

The **Level 2 Award in Playwork (QCF)** aims to provide learners with the opportunity to generate evidence of the knowledge required for the Level 2 Certificate in Playwork and Level 2 Diploma in Playwork (NVQ). This qualification provides a solid introduction to the Playwork sector providing progression routes through to employment.

The **Level 2 Certificate in Playwork (QCF)** aims to further develop skills and knowledge required for playworkers or those interested in becoming a playworker. Candidates can access this qualification either through progression from the knowledge gained from the Level 2 Award in Playwork (QCF) or as a direct route to the Certificate. This qualification provides the most up-to-date knowledge for working within the Playwork sector providing progression routes through to employment ie the Apprenticeship in Playwork and additional areas.

The **Level 2 Diploma in Playwork (NVQ) (QCF)** aims to provide candidates with the necessary skills, knowledge and competence required to **work** in the Playwork sector. Candidates can access this qualification either through progression from the knowledge gained from the Level 2 Award in Playwork and/or Level 2 Certificate in Playwork or as a direct route to the Diploma. Therefore, on successful completion of this qualification candidates will have demonstrated the essential skills in employment.

The **Level 2 Diploma in Playwork (NVQ) (QCF)** also contributes to the Apprenticeship in Playwork, please see SkillsActive website for details of the Framework.

## 1.1 Qualification structure

To achieve the Level 2 Award in Playwork (QCF), learners must achieve 10 credits from the mandatory units **(units 201 – 203)**.

To achieve the Level 2 Certificate in Playwork (QCF), learners must achieve 25 credits from the mandatory units **(units 201 – 207 and 301)**.

## 2 Centre requirements

This section outlines the approval processes for Centres to offer these qualifications and any resources that Centres will need in place to offer the qualifications including qualification-specific requirements for Centre staff.

### Centres already offering City & Guilds qualifications in this subject area

Centres approved to offer the qualification 4840-02 Level 2 NVQ in Playwork may apply for approval for the new Level 2 Award/Certificate/Diploma (NVQ) in Playwork using the **fast track approval form**, available from the City & Guilds website.

Centres may apply to offer the new qualifications using the fast track form

- providing there have been no changes to the way the qualifications are delivered, and
- if they meet all of the approval criteria specified in the fast track form guidance notes.

Fast track approval is available for 12 months from the launch of the qualification. After this time, the qualification is subject to the **standard** Qualification Approval Process. It is the centre's responsibility to check that fast track approval is still current at the time of application.

### 2.1 Resource requirements

#### Human resources

Staff delivering these qualifications must be able to demonstrate that they meet the following occupational expertise

#### Occupational competence for assessors, internal and external verifiers for the Level 2 Playwork

The following sections set out the criteria for their appointment;

##### Assessors

Must meet the technical criteria developed for each occupational area or sporting context to ensure their technical competence in relation to the units being assessed.

Assessors are appointed by an Approved centre and approved by the Awarding Body through their occupationally competent External Verifier. They should only assess in their acknowledged area of technical and occupational competence.

Assessors should be one of the following:

- Employed by the same organisation as the candidate or ...
- Working in partnership with, and drawing on evidence from, the candidate's organisation or ...
- An expert brought in to supplement the expertise of the candidate's own organisation or as an additional external method of quality assurance.

For the Level 2 Diploma in Playwork (NVQ) (QCF) the prospective Assessor should:

- hold the Assessor Units A1 and A2 [New assessors should have a clear action plan for achieving units A1 and A2. An assessor or verifier who has gained certification must support assessment decisions by assessors who are still working towards certification.]
- meet the Technical criteria developed for each occupational area or sporting context to ensure their technical competence in relation to the units being assessed
- provide evidence of recent experience and competence in the occupational area to the level of the qualification(s) they wish to assess
- provide evidence of knowledge, understanding and application of the National Occupational Standards with the Assessment Specification
- provide evidence of knowledge, understanding and support of the relevant Active Leisure and Learning Values Statements and how they are applied in assessment
- demonstrate a commitment to uphold the integrity of the National Occupational Standards and prevent their misuse
- provide evidence of their ability to maintain occupational competence and to participate in assessor training initiatives for continuous professional development.

Approved Centres may have additional generic criteria and personnel specifications in addition to the above

All assessors who operate within the S/NVQ system should gain A1 and A2 Assessment Units, thereby confirming their ability to utilise the full range of tools required to properly assess the individual at work over a period of time.

### **Internal Verifiers**

Must meet the technical criteria developed for each occupational area or sporting context to ensure their technical competence in relation to the units being assessed.

Internal Verifiers should be in a position to influence an approved centre's assessment policy and to facilitate the assessment process and should be one of the following:

- employed by the same organisation (approved centre) as the assessors or...
- working in partnership with, and drawing on evidence from, assessors' organisation(s)(approved centre)

For the Level 2 Diploma in Playwork (NVQ) (QCF) the prospective Internal Verifier should:

- hold Verifier Unit V1 and it is recommended, also hold the Assessor Units A1 and A2 (New internal verifiers should be given a clear action plan for achieving unit V1)
- meet the Technical criteria developed for each occupational area or sporting context to ensure their technical competence in relation to the units being assessed
- provide evidence of recent experience in the occupational area
- provide evidence of knowledge, understanding and application of the National Occupational Standards with the Assessment Specification
- provide evidence of knowledge, understanding and support of the relevant Sport and Recreation Values Statements
- demonstrate a commitment to uphold the integrity of the National Occupational Standards and prevent their misuse
- provide evidence of their ability to maintain occupational competence and to participate in IV/assessor training initiatives for continuous professional development.

Approved Centres may have additional generic criteria and personnel specifications in addition to the above

The Internal verifier is responsible for the consistency of standards across all portfolios  
Internal verifiers should observe each assessor conducting candidate assessments at regular intervals. The reliability, validity and authenticity of evidence must be checked during these observations

### **External Verifiers**

Must match the technical criteria which are developed for each occupational area or sporting context to ensure their current technical competence in relation to verifying the units being assessed.

For the Level 2 Diploma in Playwork (NVQ) (QCF) prospective External Verifiers should:

- hold Verifier Unit V2 and it is recommended, also hold the Assessor Units A1 and A2 (New external verifiers should be given a clear action plan for achieving unit V2)
- demonstrate knowledge and understanding of, and support for, the Sector's Values Statements and Codes of Ethics and how they are applied in assessment
- match the technical criteria which are developed for each occupational area or sporting context to ensure their current technical competence in relation to verifying the units being assessed
- be occupationally competent in the area appropriate to the level of the qualifications they are to be verifying
- provide evidence of knowledge, understanding and application of the National Occupational Standards together with Technical Definitions where appropriate
- be committed to the application, further development and refinement of the National Occupational Standards and SVQs/NVQs
- demonstrate a commitment to uphold the integrity of the National Occupational Standards and prevent their misuse
- are aware of national issues affecting vocational education, training and qualifications in the sector
- Provide evidence of knowledge of the Active Leisure and Learning framework of qualifications
- be committed to the content and guidance provided in the current edition of the SSC's Assessment Strategy
- demonstrate their ability to maintain credibility with the sector and to retain the confidence of the industry through commitment to ongoing personal and professional development

What follows are the specific criteria for the Level 2 in Playwork and they apply equally to prospective external and internal verifiers and assessors, who must:

Required criteria:

1. have worked with children and young people as a Playworker in settings underpinned by the Playwork Principles
2. demonstrate Playwork experience, knowledge and skills required to make accurate judgements about others' competence
3. have knowledge and understanding of, and commitment to, the Playwork Principles
4. have actively and consistently participated in a process of current and relevant continuous professional development to keep up to date with best Playwork practice. This must be evidenced by a reflective account (this could include attendance at sector training days, seminars and conferences, training, reading and face to face work)

Desirable criteria;

1. have a relevant and nationally recognised Playwork training course or qualification from the QCF in England/Wales and Northern Ireland. Or an action plan to achieve such.

Centre staff may undertake more than one role, eg tutor and assessor or internal verifier, but must never internally verify their own assessments.

### **Continuing professional development (CPD)**

Centres are expected to support their staff in ensuring that their knowledge remains current of the occupational area and of best practice in delivery, mentoring, training, assessment and verification, and that it takes account of any national or legislative developments.

## **2.2 Candidate entry requirements**

Candidates should not be entered for a qualification of the same type, content and level as that of a qualification they already hold.

Generally, there is no prescribed recommended prior knowledge, attainment or experience needed to gain access to this qualification. Candidates will be employed within the industry and as such would have been through a selection process. It is recommended that potential candidates are initially assessed on entry, so that levels of literacy, numeracy, communication skills, and sector understanding can be determined. This initial assessment should consider previous qualifications and practical experience. It is important to remember that centres must ensure that candidates have the potential and opportunity to gain evidence for the qualification in the work place.

For funding purposes, centres are reminded that candidates should not be entered for a qualification of the same type, content and level as that of a qualification they already hold.

### **Age restrictions**

These qualifications are not approved for use by candidates under the age of 16, and City & Guilds cannot accept any registrations for candidates in this age group.

Restrictions apply to candidates under the age of 18 working unsupervised with children. Centres and candidates should be fully aware of minimum age requirements in their home nation and any implications on completing assessments.

### **Other legal considerations**

The following legal considerations apply to this qualification:

- Criminal Records Bureau (CRB) checks in relation to working with children.

## 3 Course design and delivery

### 3.1 Initial assessment and induction

Centres will need to make an initial assessment of each candidate prior to the start of their programme to ensure they are entered for an appropriate type and level of qualification.

The initial assessment should identify:

- any specific training needs the candidate has, and the support and guidance they may require when working towards their qualification. This is sometimes referred to as diagnostic testing.
- any units the candidate has already completed, or credit they have accumulated which is relevant to the qualification they are about to begin.

### 3.2 Recommended delivery strategies

Centre staff should familiarise themselves with the structure, content and assessment requirements of the qualification before designing a course programme.

Centres may design course programmes of study in any way which:

- best meets the needs and capabilities of their candidates
- satisfies the requirements of the qualification.

When designing and delivering the course programme, centres might wish to incorporate other teaching and learning that is not assessed as part of the qualification. This might include the following:

- literacy, language and/or numeracy
- personal learning and thinking
- personal and social development
- employability

Where applicable, this could involve enabling the candidate to access relevant qualifications covering these skills.

## 4 Assessment

### 4.1 Summary of assessment methods

The assessment for the **Level 2 Award & Level 2 Certificate in Playwork (QCF)** will be through practical demonstration and assignment.

The assessment for the **Level 2 Diploma in Playwork (NVQ) (QCF)** will be through portfolio work. The most appropriate methods are through:

- observation by a qualified and occupationally expert assessor (as defined in the Assessment Strategy)
- expert witness statements: statements by a line manager or already qualified playworker
- other forms of witness testimony e.g. from a colleague, parent/carer or a child. They must be a credible witness (who can be checked out if needed)
- reflective account by the candidate that details what the candidate said, did and why
- work products showing work undertaken by the candidate
- professional discussion where the candidate describes what they said, did and why

City & Guilds provides the following assessments:

- Assignments - (EN-02-4964)

### Time constraints

- All assignments must be completed and assessed within the candidate's period of registration. Centres should advise candidates of any internal timescales for the completion and marking of individual assignments.

### 4.2 Assignments

A separate Assessment Pack is available for these qualifications [www.cityandguilds.com](http://www.cityandguilds.com) or EN-02-4964

### 4.3 Evidence requirements

#### General assessment principles

##### *Holistic assessment*

Whilst the Award, Certificate and Diploma are broken down into separate units of assessment, the work of the playworker is not. This means that, as the playworker learns and applies these knowledge and skills when working with children and young people, they are likely to generate evidence across a number of units of assessment. Using this evidence for all the units it relates to is part of a holistic to assessment.

Many of these units cover interrelated responsibilities, and much of the evidence for these is likely to come from questioning the learner to ensure they have the necessary knowledge and skills and observing them putting these knowledge and skills into practice.

For this reason, we strongly recommend that, if the learner is attempting the whole Diploma, for example, interrelated units are assessed in a holistic manner. In other words, when assessor questioning and observations occur, the assessor is strongly advised not to carry out assessments on separate occasions for each of these units, but to visit the play setting, monitor all the work the

learner does with children and young people, and identify how the evidence they generate matches the requirements of any or all of these units.

Separate assessments for each of these units should only be necessary if the learner is not attempting whole qualifications, but is seeking single unit achievement only. If more than one unit is being attempted, opportunities should also be sought for a 'holistic' approach.

#### *How much evidence is necessary?*

For the units contained in the Award and Certificate, evidence is required for knowledge, understanding and skills with only limited requirements to show their application in practice. Knowledge and understanding for these units need only be assessed on one occasion. Appropriate assessment methods may include: oral and written questioning, projects and assignments and professional discussion. Assessors must keep accurate records of these assessments, when and how they were done and their outcomes. The limited application of this knowledge and understanding need only be assessed on one occasion. Appropriate assessment methods may include: direct observation, looking at products of the learner's work, taking witness testimony from managers or more experienced playworkers.

The units that are unique to the Diploma, however, are not intended to be a snapshot of the learner's work, but should provide a confirmation that the learner meets the national occupational standards on a consistent basis in the workplace over time.

The units that are unique to the Diploma, therefore, require primary evidence to be gathered by means of fully recorded observations carried out by an A1 (or equivalent) qualified assessor who is also occupationally expert as defined by the Assessment Strategy and the Playwork Annex.

It is recommended that a total of 18 hours of observation should take place, with each observation session being followed by a professional discussion. Evidence for each learning outcome and assessment criterion must be 'cross referenced', 'mapped' or 'logged' on one occasion only.

Observational evidence should be supplemented by additional performance evidence, such as witness testimony, reflective accounts and extra professional discussion, reflective account, only on occasions when the assessor has not been present or because the evidence is not generated on a frequent basis.

Assessment occasions should not take place on the same day. The assessor must satisfy themselves that the candidate is practising competently not only during observations but also at other times as well.

In the case of a very few learning outcomes and assessment criteria, assessors and verifiers should be aware that opportunities for the candidate to generate appropriate evidence may be rare, and therefore it will be acceptable to use 'historical evidence' – i.e. evidence produced before the candidate has registered for the Diploma. However, this evidence should not be more than two years old and should be validated as being authentic.

#### *Simulation*

There are some learning outcomes for which simulation is allowable. These are covered in each individual unit. It should be noted that simulations must meet the requirements laid out in the SkillsActive Assessment Strategy.

### *Collecting Evidence*

When collecting evidence, assessors need to ensure that:

- Evidence comes from work situations where the candidate is carrying out their everyday practice.
- These situations should be as natural as possible and not staged for the purposes of assessment
- Observation focuses on the candidate's natural working practices and is, therefore, likely to cover a number of learning outcomes and assessment criteria across a number of units at the same time.

It is expected that each assessment criterion will be evidenced through observation by an A1 (or equivalent) qualified assessor at least once. However, there may be some assessment criteria that are not possible to see through direct observation. On these occasions assessor observation must be supplemented by further observations or additional performance evidence such as witness testimony, products of work, reflective accounts or professional discussion.

Once a candidate has demonstrated that they are competent for specific learning outcomes and criteria evidence can be cross referenced to the units according to the awarding bodies/assessment centre's processes.

### *Observations*

The main evidence for the Level 2 Diploma in Playwork (NVQ) (QCF) must be collected and evaluated by an A1 (or equivalent) qualified and occupationally expert assessor who observes and records the candidate's regular work practice. The awarding bodies have indicated that they would expect in the region of 18 hours of observation across the units that are unique to the Diploma.

The recording [written or aural] should be a narrative of what the assessor has seen, without value comments or judgements. [The methodology of where and how this is recorded is not prescribed and can be at the discretion of the assessment centre and their awarding body].

Within each observation the candidate will be seen to be meeting requirements across a number of units.

- An observation should include all that the assessor sees, whether this demonstrates competence or not.
- An observation is a narrative of the candidate at work. All that the candidate does should be recorded.
- An observation should be followed by a process in which the assessor and candidate have a dialogue about what has happened so the assessor is able to 'gain a window' on what the candidate has been thinking whilst their work has been taking place.
- All observational evidence that relates to a candidate's attitude, values and adherence to the Playwork Principles needs to be supported by professional discussion, reflective account, questioning, reflective accounts or post-observation feedback

In some exceptional cases, it may not be possible to observe a candidate demonstrating their competence for a particular performance criterion or range item because:

- An appropriate situation never happens when the assessor is present, even though the assessor has observed on more than one occasion
- It is not everyday practice and so cannot be expected to be seen even after several visits
- It is not the sort of performance that the assessor would see because it happens outside of normal face-to-face work with children and young people, for example team meetings, supervision sessions or trips outside of the play setting.

In these cases (which must be the exception, rather than the rule), evidence may be gained by other means, for example from witness testimony, products of work or reflective accounts).

### *Knowledge and understanding*

All knowledge and understanding should be rooted in practice; ie a candidate should give examples from their day-to-day work to show their knowledge and understanding in practice and the principles that underpin this. There must be evidence that the candidate possesses all of the knowledge and understanding required by the units. In most cases this will be done through professional discussion, reflective account, questioning, reflective accounts or post-observation feedback. Other techniques, such as written questions, projects and assignments might also be appropriate so long as they are still rooted in the candidate's practice.

### *Validity and Consistency of Observations*

Assessors must ensure validity and consistency of a candidate's competence. Assessors will achieve this through the feedback/discussion session which follows observation and is an integral part of the assessment process.

- All observations must be followed by a feedback/discussion session, ideally taking place within 5 working days of the observation
- As part of the feedback/discussion session, the assessor and candidates must discuss what has been observed
- The discussion will be reflective in nature, typically the candidates will discuss what they've been doing during the observation and why
- The assessor will record, on the centre's feedback documentation, that the discussion has taken place, and how it ensures validity and consistency

In observing the candidate, the assessor will be present on more than one occasion. Performance evidence for the whole NVQ will be generated over a series of assessment visits where detailed observations of the candidate's practice will be recorded.

Observational evidence will be supported and supplemented by additional performance evidence such as witness testimony, reflective accounts and professional discussion.

The assessor has the responsibility to make a judgement about whether the candidate demonstrates consistency of practice over time. This is more than the candidate demonstrating elements of their competence on all the occasions when the assessor is present but is also about the assessor making the judgement that competent practice takes place when the assessor is not present.

### *Recording of competence*

The process of documenting evidence requires that the evidence is 'cross referenced', 'logged' or 'mapped' to the learning outcomes and assessment criteria. The Internal Verifier may wish to question the assessor's judgment on consistency over time to ensure the rigour of the process.

## **4.4 Recording forms**

City & Guilds has developed these recording forms\*, for new and existing centres to use as appropriate. Although it is expected that new centres will use these forms, centres may devise or customise alternative forms, which must be approved for use by the external verifier, before they are used by candidates and assessors at the centre. Alternatively, City & Guilds endorses a number of electronic recording systems. For details, go to the e-Portfolios page on SmartScreen.co.uk.

\*Forms 4, 5, 6, 7, 9, 10 and 11, or approved alternatives, are a requirement. The other forms have been designed to support the assessment and recording process. See Appendix

## **4.5 Recognition of prior learning (RPL)**

Recognition of Prior Learning (RPL) recognises the contribution a person's previous experience could contribute to a qualification.

- RPL is allowed and is also sector specific.

### Evidence of real work activity

There must be evidence that the learner has met all of the requirements listed under 'the learner will be able to' through their own work. This evidence must be gathered by the assessor observing the learner on more than one occasion. There should be sufficient observations to ensure that the learner has met all the requirements.

There must also be evidence that the learner's work has met the requirements listed in 'assessment criteria'. This must include as a minimum:

- All types of ways to communicate

This may be gathered through a combination of assessor observations, witness testimony and/or authentic records of the learner's work (for example, diaries and/or reflective accounts countersigned by a senior colleague). The remainder may be assessed through supplementary evidence (see below).

#### **Simulation**

Simulation is allowed for 2.5 only, if there is no naturally occurring evidence is available.

#### **Use of supplementary evidence**

Supplementary evidence should only be used for items under 'assessment requirements or guidance specified by a sector or regulatory body' that do not require evidence of real work activity.

#### **Knowledge and understanding**

There must be evidence that the learner possesses all of the knowledge and understanding shown in the unit assessment criteria listed against 'the learner will know how to'. In most cases this can be done by the assessor questioning the learner orally. However, other techniques, such as projects, assignments and/or reflective accounts may also be appropriate.

Assessors should note that some of the knowledge and understanding items require the learner to show that they know and understand how to do something. If there is evidence from the learner's own work that they know and understand this technique (as there should be), there is no requirement for them to be questioned again on this topic.

#### Play process

What the child goes through and what they experience and what they feel whilst they are engaged in playing.

#### Intervention style

A range of methods the playworker can use in the play environment - these may range from complete non-involvement through to specific intervention and may include: waiting to be invited to play; enabling un-interrupted play; enabling children and young people to explore their own values; leaving children and young people to improve their own performance; leaving the content/intent of play to the children/young people; letting the children and young people decide why they play; enabling the children and young people to decide what is appropriate behaviour; only organising when children and young people want you to.

**Play cues**

Facial expressions, language or body language that communicate the child or young person's wish to play or invite others to play.

This evidence must be gathered by the assessor observing the learner on more than one occasion. There should be sufficient observations to ensure that the learner has met all the requirements.

There must also be evidence that the learner's work has met the requirements listed in 'assessment criteria'.

This may be gathered through a combination of assessor observations, witness testimony and/or authentic records of the learner's work (for example, diaries and/or reflective accounts countersigned by a senior colleague). The remainder may be assessed through supplementary evidence (see below).

#### **Simulation**

Simulation is not allowed for this unit.

In most cases this can be done by the assessor questioning the learner orally. However, other techniques, such as projects, assignments and/or reflective accounts may also be appropriate.

Assessors should note that some of the knowledge and understanding items require the learner to show that they know and understand how to do something. If there is evidence from the learner's own work that they know and understand this technique (as there should be), there is no requirement for them to be questioned again on this topic.

## **Unit 307                      Support Work with Parents and Carers in the Play Environment**

### Evidence of real work activity

There must be evidence that the learner has met all of the requirements listed under 'the learner will be able to' through their own work. This evidence must be gathered by the assessor observing the learner on more than one occasion. There should be sufficient observations to ensure that the learner has met all the requirements.

There must also be evidence that the learner's work has met the requirements listed in 'assessment criteria'.

This may be gathered through a combination of assessor observations, witness testimony and/or authentic records of the learner's work (for example, diaries and/or reflective accounts countersigned by a senior colleague). The remainder may be assessed through supplementary evidence (see below).

#### **Simulation**

Simulation is allowed for 1.3 only, if there is no naturally occurring evidence is available.

#### **Use of supplementary evidence**

Supplementary evidence should only be used for items under 'assessment requirements or guidance specified by a sector or regulatory body' that do not require evidence of real work activity.

#### **Knowledge and understanding**

There must be evidence that the learner possesses all of the knowledge and understanding shown in the unit assessment criteria listed against 'the learner will know how to'. In most cases this can be done by the assessor questioning the learner orally. However, other techniques, such as projects, assignments and/or reflective accounts may also be appropriate.

Assessors should note that some of the knowledge and understanding items require the learner to show that they know and understand how to do something. If there is evidence from the learner's own work that they know and understand this technique (as there should be), there is no requirement for them to be questioned again on this topic.

## Appendix 1      Playwork Principles

These Principles establish the professional and ethical framework for playwork and as such must be regarded as a whole.

They describe what is unique about play and playwork, and provide the playwork perspective for working with children and young people.

They are based on the recognition that children and young people's capacity for positive development will be enhanced if given access to the broadest range of environments and play opportunities.

1. All children and young people need to play. The impulse to play is innate. Play is a biological, psychological and social necessity, and is fundamental to the healthy development and well being of individuals and communities.
2. Play is a process that is freely chosen, personally directed and intrinsically motivated. That is, children and young people determine and control the content and intent of their play, by following their own instincts, ideas and interests, in their own way for their own reasons.
3. The prime focus and essence of playwork is to support and facilitate the play process and this should inform the development of play policy, strategy, training and education.
4. For playworkers, the play process takes precedence and playworkers act as advocates for play when engaging with adult led agendas.
5. The role of the playworker is to support all children and young people in the creation of a space in which they can play.
6. The playworker's response to children and young people playing is based on a sound up to date knowledge of the play process, and reflective practice.
7. Playworkers recognise their own impact on the play space and also the impact of children and young people's play on the playworker.
8. Playworkers choose an intervention style that enables children and young people to extend their play. All playworker intervention must balance risk with the developmental benefit and well being of children.

The Playwork Principles were developed by the Playwork Principles Scrutiny Group, convened by Play Wales and adopted by SkillsActive in 2005.

## Appendix 2      FAQs on New Playwork Level 2

**Please note references to funding relate to SFA funding for England only.**

**Q: How many face to face learning hours are required? How are these being funded? What is the guidance on how many hours would be required to be taught, the unit/credit value and the relationship between this and the funding.**

**A:** Guided learning hours are used during the consideration and allocation of credit values, and are used by LSC to assign exact funding rates. However the values Skillsactive quote are no more than averages/compromises agreed by those involved in the credit rating exercise. The actual hours are up to each provider, unless the awarding organisation provides any guidance/requirements – either way, it is outside the control of SkillsActive.

For more information on funding go to LSC web site [www.lsc.gov.uk](http://www.lsc.gov.uk)

**Q: What is the guidance for assessment requirements?**

**A:** These are provided to all awarding organisations for them to provide to their centers in whatever way they wish. They are only provided for Diploma (NVQ), not for Award or Certificate.

**Q: Why are there L2 and L3 units in a L2 qualification.**

**A:** This is one of the founding principles of the QCF. Refer to QCDA/Ofqual web sites to find out about QCF. [www.qcda.gov.uk](http://www.qcda.gov.uk)

**Q: How does the level 2 qualification compare to the CCLD qualification in relation to learning hours and credits?**

**A:** The Children's Care Learning and Development (CCLD) national vocational qualification will disappear when the national qualifications framework ceases to exist in December 2010 and, being an NVQ, does not have credits attached, nor learning hours. To replace the CCLD at level 2, the Children's Workforce Development Council (CWDC) has developed a level 2 Certificate in Work with Children which confers 'competence under supervision', and provides a progression route into the level 3 Diploma in Work with Children. However the level 2 Certificate in work with children does not provide full competence in the way that the level 2 Playwork Diploma (NVQ) does.

**Q: What happens when funding for current NQF qualifications stops and the funding streams for the new qualifications have not yet started?**

**A:** There should be no gap. For any qualification accredited by Ofqual on the QCF between 1 April and 31 August this year, providers will be required to deliver it "as soon as possible" (LSC), but new starters on the NQF qualification can continue to be funded until the QCF qualification is realistically able to be delivered – this NQF funding will in theory be available up to 31 December this year, however the expectation is clearly that providers will be delivering these qualifications long before then, as the units have already been available now for some time for awarding organisations to accredit.

**Q: How will the qualifications be funded?**

**A:** LSC has yet to confirm this for definite as they keep changing the criteria for funding, and no qualification's fundability will be confirmed by LSC until an awarding organisation has received accreditation for it by Ofqual. However, as things stand at the time of writing, it looks like the following will probably be the case for **19+ learners**:

**Award** – LSC has now announced it will not fund any Award sized qualification at level 2 or above.

**Certificate** – This should be fundable under Adult Learner Responsive funding as working towards full competence.

**Diploma** – This should be fundable under Train to Gain funding, plus (if delivered in a college setting) under Adult Learner Responsive funding. However only the minimum credit value of 61 credits can be funded – for any learner selecting optional units which give a total credit value of more than 61, the credits above 61 will not be funded.

**For 14-19 learners:**

**Award** – This should be fundable as it will form part of the apprenticeship framework.

**Certificate** – This should be fundable as it will form part of the apprenticeship framework.

**Diploma** – This should be fundable as it will form part of the apprenticeship framework.

## Appendix 3 Relationships to other qualifications

### Links to other qualifications and frameworks

City & Guilds has identified the connections to previous qualifications. This mapping is provided as guidance and suggests areas of overlap and commonality between the qualifications. It does not imply that candidates completing units in one qualification are automatically covering all of the content of the qualifications listed in the mapping.

Centres are responsible for checking the different requirements of all qualifications they are delivering and ensuring that candidates meet requirements of all units/qualifications. For example, units within a QCF qualification may be similar in content to units in the NQF qualification which the candidate may have already undertaken and this may present opportunities for RPL.

These] qualifications have connections to the:

## **Appendix 5      Explanation and examples of terms**

### **Ability**

The quality of being able to do something; a quality that permits or facilitates achievement or accomplishment.

### **Acceptable level of challenge and risk**

A level of challenge and risk that provides the potential for children and young people to learn and develop without causing risks that are not acceptable to your play setting's policies and procedures for health and safety.

### **Aims**

### **Affective play space**

A space that pays attention to and supports the variety of feelings and moods that children and young people bring with them or have during play. The space has particular areas, materials and/or props that at different times stimulate or encourage the expression, experience or experimentation with a range of emotions; and seeks to develop via diverse means, an overall ambience of welcome, acceptance, freedom and playfulness.

### **Assessing risk**

Your organisation should already have carried out formal risk assessments for all aspects of your play environment; this will result in written health and safety policies and procedures. However, every worker is responsible for identifying hazards when they occur, assessing the risks they present and taking action to control these risks in line with their organisation's policies and procedures.

### **Anti-discriminatory practice**

Taking positive action to counter discrimination; this will involve identifying and challenging discrimination and being positive in your practice about diversity without compromising the right of individuals to play.

### **Barriers to access**

Things that prevent or discourage children and young people from taking part in play provision. These may include physical barriers for disabled children and young people, but also include wider issues such as discrimination, lack of positive images, lack of culturally acceptable activities and customs, language barriers and many other factors that affect different communities.

**Bridging worker**

A person who can act as a link or a 'bridge' between a disabled child, their family, and the play environment. The primary aim of the bridging role is to enable disabled children and disabled young people to gain access to local play environments of their choice. In the process, bridging workers boost the confidence of the child/young person, family and the play environment. Other vital aspects of the role are: information sharing, networking, training, supporting and advising – working both with the child/family, as well as with the relevant professionals and agencies involved.

Some indicators could result from for example bereavement, difficulties or transitions at home or school. Indicators may also suggest the possibility of child abuse or an abusive situation.

**Consult/consultation**

An active two-way process of informing and involving individuals and groups to encourage the sharing of ideas, views and opinions especially in order to reach an agreed decision.

**Continuing professional development**

These include the progressive development of the child's intellectual skills; personality development, involving the complex interaction between psychological and social factors and the stage-by-stage development of the body and physical skills; it also includes socialization, the process by which children and young people adjust to society and its demands.

Decisions made after discussion with and between children and young people on how they would like to be treated by/treat others. These agreements are often made on an ad hoc basis to fit a particular or spontaneous situation, but can also be made on an informal or formal basis. They are flexible and exist to accommodate children and young people's requirements and preferences, rather than be rules imposed by adults.

### **Hazard**

Something that may cause harm to the health, safety and welfare of users of the play environment, for example, broken glass, faulty play equipment, doors being left open that should be closed.

### **Non-verbal communication**

Expressing through and making inferences from such things as gestures, facial expressions and body language.

### **Observation**

The purpose of observation in a play environment is to observe children and young people's play behaviours and the response of adults to ensure the environment continues to provide effective play spaces. These observations may include play types, cues and returns and playworkers' interventions. These observations are not for the purpose of monitoring children's development, planning activities or a curriculum; observations may or may not be recorded.

**Segregated play provision**

The setting aside of disabled children and young people, based on a professional’s view of impairment and lack of ability to ‘fit in’. Non-disabled professionals have total control.

**Security hazards**

The ratio of staff to children and young people as laid down by the play organisation's policies and procedures and legal requirements.

### **Support**

A process by which the playworker might encourage, help, inspire, motivate or advocate for children and young people without directing, controlling or instructing children and young people.

### **Transient play space**

Spaces that change or get modified, adapted or deconstructed using a wide range of movable resources, props, materials and structures – breaking up the wider physical space into different smaller spaces for different kinds of play at different times; examples may include: creating dens and hidey-holes; using fabrics and loose parts to create imaginative places like a hospital or a forest; shifting furniture back or around to accommodate particular games; a transient play space could be the couple of cubic feet behind a piece of furniture, a whole room or field; it could be created spontaneously or planned beforehand.

### **Transition**

Most children and young people naturally pass through a number of physical and emotional stages as they grow and develop. Often, they will also be expected to cope with changes such as movement from primary to secondary school and for disabled children or children with chronic ill health, there may be an additional change of support moving from children's to adult services. Such changes are commonly referred to as transitions. Some children may have to face very particular and personal transitions not necessarily shared or understood by all their peers. These include: family illness or the death of a close relative; divorce and family break-up; issues related to sexuality; adoption; the process of asylum; disability; parental mental health; and the consequences of crime.

### **Unacceptable risk**

When a child or young person engages in play behaviour that is likely to result in death or serious injury. Other risks, whilst being perceived as dangerous and potentially harmful, can be considered acceptable because the benefits of the play experience outweigh the harm that may occur.
